Last ESG Rating action

Rating action date: September 19, 2025

BASF has been downgraded to 'BBB' from 'A'.

As a producer of industrial chemicals in Germany and North America (~50% of FY 2024 assets), where carbon regulations are stringent, BASF may face risks such as compliance costs, based on our model. However, we note its GHG emissions intensity increased at a CAGR of 13.7% over FY 2022–24; this mainly drives the downgrade. The company continues to lag industry peers in chemical management practices. Its overall governance practices are average relative to those of global peers, per our model.

- BASF's large workforce (108,881 in FY 2024 vs. industry average of 15,247) may pose labor management challenges, per our model. We note the presence of collective bargaining agreements. As of September 2024, our assessment of non-pay benefits focuses on the quality and scope of the company's parental leave benefit. While we found evidence of parental leave, BASF's offering did not meet our benchmark.
- Production of pesticides and paint solutions may entail liabilities tied to pollutant emissions, per our model. BASF's SOx and VOC emissions intensities declined at a CAGR of 14% and 10%, respectively, over FY 2021–24. However, it continues to face lawsuits alleging PFAS-related water contamination and health issues.
- The board is majority independent of management. However, BASF's chair is a former CEO. His prior leadership may impact his ability to provide independent leadership of the board. While its business ethics framework includes a detailed anti-corruption policy, it appears to lack mandatory ethics training for all staff.

Analyst: Mara Angelika Quizon

Report table of contents

What is an ESG Rating? MSCI ESG Ratings aim to measure a company's resilience to long-term ESG risks. Companies are scored on an industry-relative AAA-CCC scale across the most relevant Key Issues based on a company's business model.

ESG Rating scorecard

As of January 27, 2026

KEY ISSUE	WEIGHT	INDUSTRY AVERAGE	SCORE (0-10)	CHANGE	EXPLANATION
Weighted-Average Key Issue Score		**4.1**	**4.7**		
ENVIRONMENT	**49%**	**4.4**	**4.8**		
Carbon Emissions	13%	6.7	7.1		• Carbon Intensity 88% lower than industry average
Toxic Emissions & Waste	13%	2.8	0.7		• Involved in severe & moderate controversies • 100% of operations from business lines with relatively high toxic emissions and waste intensities • Limited to no evidence of environmental policies and commitments
Water Stress	13%	4.1	5.6		• Relatively low risk of operational disruptions or increased costs related to water shortages relative to peers • Evidence of robust water management strategy compared to industry peers, including initiatives to improve water-use efficiency
Opportunities in Clean Tech	10%	4.1	6.1		• Significant revenues from clean tech product lines relative to peers
SOCIAL	**18%**	**2.5**	**0.6**		
Chemical Safety	12%	2.4	0.0		• Involved in severe controversy • 69% of revenues from products subject to stringent chemical regulations • Limited evidence of efforts to minimize potential harm from chemical substances of concern relative to peers
Labor Management*	6%	5.6	1.8		• Involved in severe controversy • Large workforce relative to peers • Relatively limited labor management initiatives compared to peers
GOVERNANCE	**33%**	**5.2**	**6.8**	**▲0.5**	
Corporate Governance		5.6	7.3		• The company falls into the average scoring range relative to global peers, reflecting relatively few areas of concern.
Corporate Behavior		6.5	7.1	▲1.2	• Evidence of detailed policies on business ethics and corruption

* denotes company-specific Key Issue
This table shows the Key Issue scores and weights contributing to the company's ESG Rating and any changes to those scores since the last ESG Rating action. The range of possible scores is 0-10, where 10 is best and 0 is worst.

Rating model details

BASF was rated based on a modified version of the Commodity & Diversified Chemicals Industry ESG Rating model:

- Labor Management has been added as a company-specific Key Issue due to the company's involvement in labor-related issues.

MODEL VERSION: 4.3.4

Represents the MSCI ESG Ratings model version used to assess the company. Please refer to the "ESG Ratings Methodology" document for more details on the model versions.

Analyst insights

Significant shareholder opposition to pay practices and chair's re-election

October 02, 2024

BASF faced strong shareholder opposition to its pay practices and the re-election of its supervisory board chair at its 2024 annual general meeting (AGM), highlighting existing potential weaknesses with respect to supervisory board and committee independence as well as pay practices.

Amid the challenges faced by the European chemical industry due to elevated energy costs in recent years, BASF took significant cost-cutting measures, including plant closures, layoffs and reduced investment. BASF's FY2023 pay report received 81% of votes in favor at the 2024 AGM, marking a significant decline from 92% in 2023. Under our assessment, BASF CEO's annual incentives failed to reflect the company's recent performance, and the CEO equity policy did not effectively align executive incentives with shareholder interests. The company also held a vote on the executive pay policy at the 2024 AGM and received only 77% of favorable votes. Among German constituents of the MSCI ACWI Index that submitted their executive pay policy to a shareholder vote in 2024, the average of favorable votes received was 84%, according to our data as of October 2024.

BASF's supervisory board and nomination committee chair, Kurt Bock, is a former CEO (2011-2018) of the company and was therefore not considered independent of management, based on our criteria. His previous role as CEO, which included a period during which he served on the management board alongside the current CEO, suggests that he has important influence at the company. BASF was among only 13% of German constituents of the MSCI ACWI Index that were flagged for leadership concerns. Bock was re-elected to the board at the 2024 AGM with 68% of favorable votes, mostly unchanged from 2020 when his appointment was last put to a vote.

Based on our criteria, BASF's pay committee was not considered fully independent due to Bock's membership, as of October 2024. However, the independent vice chair of the supervisory board, who chairs the pay committee, may help the company effectively address shareholder concerns about its pay practices.

Executive pay linked to climate goals, but some shareholder raised concerns about climate strategy

June 24, 2021
Aura Toader

BASF committed to achieving carbon neutral growth by 2030 (from a 2018 baseline) and linked the vesting of executives' long-term incentives (LTIs) to this goal. LTIs made up approximately 38% of executives' awarded pay in 2020. Vesting will depend on four-year performance against sales volumes, EBITDA and climate goals, but the weights of these metrics were not disclosed. To achieve target performance and a 100% payout under the climate objective, BASF has to maintain total greenhouse gas emissions from production sites and energy purchases (Scope 1 and 2 emissions) at 2018 levels of 21.9 million metric tons of CO2 equivalents (MMTCO2Eq). Payouts scale from 0% to 200% of target based on a total emissions range of 24.9 to 18.9 MMTCO2Eq. This means that executives could receive a LTI payout – albeit a below-target payout – if BASF's emissions exceed 2018 levels after four years.

Shareholders approved the new pay policy at the 2020 annual general meeting (AGM) with over 90% of votes in favor. There was no vote on executive pay at the 2021 AGM, as German law only requires a say-on-pay vote if the pay policy is changed during the year (AktG, section 120a). This year, however, 24% of votes were cast against approving the actions of the supervisory board, a routine agenda item at German AGMs. Germany's Association of Ethical Shareholders recommended opposing the board approval resolution over climate concerns, including the absence of a plan to expand decarbonization goals to emissions in the company's value chain (Scope 3 emissions). None of the MSCI ACWI Index constituents in the diversified chemicals industry set an emissions reduction target that covered Scope 3 emissions as of June 2021. BASF is among 25% of industry peers that set a net zero target by 2050.

Investor concerns about new supervisory board leadership indicate potential oversight weaknesses

July 24, 2020
Florian Sommer

Chemical company BASF's former CEO Kurt Bock (2011-18) was appointed to the supervisory board at the company's June 2020 annual general meeting (AGM) and was subsequently elected as supervisory board chair. At the AGM, a substantial minority of shareholders (32.71%) voted against Bock's appointment to the supervisory board, citing concerns that his membership would weaken management oversight. At the company's most recent previous supervisory board elections in 2019, all six candidates received favorable votes of at least 90%. Under BASF's dual board system, the supervisory board is responsible for overseeing senior executives on the company's management board.

Bock's appointment to the supervisory board respected the two-year "cooling-off" period for former company executives under German law. However, we did not classify Bock as independent of management, due to his previous role as BASF's CEO. As of July 2020, BASF's supervisory board had an independent majority, but the lack of an independent chair may limit the supervisory board's ability to effectively oversee senior managers. This may be a concern for investors given other potential weaknesses in BASF's oversight arrangements, such as a lack of risk management expertise on the supervisory board and the presence of a supervisory board member who sat on a total of four boards of listed companies.

AUDIT OVERSIGHT

Audit Committee - Number Of Meetings: 5

The BASF SE board of directors includes a fully independent audit committee and at least one member of that committee meets our standards for financial expertise. This is in contrast to the 42% of companies in the home market that fail to include a fully independent audit committee. Independent audit committees help provide oversight of the critical function of financial reporting.

PAY PERFORMANCE ALIGNMENT

CEO & EXECUTIVE EQUITY

No effective stock ownership guidelines have been identified.
CEO equity policy as a multiple of salary: **1.5**

Share ownership guideline:

For the duration of their mandate and beyond, members of the Board of Executive Directors are obligated to hold a defined number of shares in the company. The number of shares that must be held for a longer term is determined at the beginning of the Board of Executive Directors mandate and generally corresponds to a value representing 150% of the member's annual gross fixed salary on that date. The conversion into a number of shares to be held is carried out using the average price of the BASF share in the fourth quarter of the year prior to the start of the first-time share ownership guideline.

MSCI standards for the CEO Equity policy Key Metric require a shareholding requirement of 500% of base salary for the CEO in order to be considered effective

Executive	Tenure (Years)	Shares Held	YoY % Change	Shareholding As % of Salary

Public Company

CAPITAL STRUCTURE

Capital Type	Votes Per Share	Shares Outstanding
Registered Shares	1.0	892,522,164

OWNERSHIP STRUCTURE

OWNERSHIP CATEGORIES

- Widely Held

NOTABLE SHAREHOLDERS

There is no principal shareholder at this firm.

5%+ shareholders - Aggregate Voting Power	**11%**

The company does not have a special capital structure, thus one vote right is afforded per common share. This principle of 'one share one vote' helps align economic and voting power and ensures that no class of shareholders has more voting power than economic exposure.

TAKEOVER PROVISIONS

Fair Price Provision	Mandatory Bid Provision	Mandatory Bid Ownership Threshold
Yes	Yes	30.0

% of Votes to Approve a Merger
75%

GOVERNING DOCUMENTS

MAJORITY REQUIREMENTS

	Bylaws	Charter
Default percentage of votes required to amend a provision	67%	75%

2024 AR p. 137

According to Article 59(1) of the SE Council Regulation, amendments to the Statutes of BASF SE require a resolution of the Annual Shareholders' Meeting adopted with at least a two-thirds majority of the votes cast, provided that the legal provisions applicable to German stock corporations under the German Stock Corporation Act (AktG) do not stipulate or allow for larger majority requirements. In the case of amendments to the Statutes, section 179(2) AktG requires a majority of at least three-quarters of the subscribed capital represented.

Country Law Mandate of Germany

SHAREHOLDER RIGHTS

There may be governance risks for investors in relation to shareholder rights and management-controlled takeover defense mechanisms at BASF SE including:

• Limits on the right of shareholders to take action by written consent

SHAREHOLDER MEETINGS & RESOLUTIONS

	Call Special Meeting	Requisition a Resolution at AGM	Act by Written Consent
Percentage of shares required	5%		N/A - no right exists

RESTRICTIONS ON LEGAL ACTION BY SHAREHOLDERS

No exclusive forum provision has been identified.

SAY ON PAY

While the company does not operate in a market which requires regular 'say-on-pay' votes, the company has provided shareholders with the ability to review and approve executive pay practices.

DIRECTOR ELECTIONS

BOARD RE-ELECTION PROVISIONS

Not all board members are subject to annual re-election. While considered by some governance experts as a means of ensuring board continuity, a classified board structure may limit the ability of shareholders to hold directors accountable and serve as a takeover defense. Some 95% of boards in the home market are flagged for not requiring directors to stand for re-election on an annual basis.

Board Re-election Provisions	
Board Re-election Frequency (Years)	3
% of Board subject to re-election	100%

DIRECTOR ELECTION STANDARD

The company has a majority standard for director elections (with immediate resignation if the director does not receive a majority of the votes cast), which enables shareholders to hold directors accountable in uncontested elections.

Director Election Rules	
Vote Standard	Majority
Immediate Binding Resignation	Yes

Statutes- constitution

The appointment of the members of the Supervisory Board is made for a term until the conclusion of the Annual Shareholders' Meeting resolving on the formal discharge of the Supervisory Board for the third financial year after the term of office commenced, with the financial year in which the term of office commences not being taken into account.

Resolutions of the Board of Executive Directors shall be passed by simple majority of the votes of the members of the Board of Executive Directors participating in the passing of the resolution, unless a larger majority is stipulated by mandatory statutory law. In cases where resolutions are to be passed by a simple majority and there is an equality of votes, the Chairman shall have a casting vote.

ACCOUNTING

Based on the company's disclosures and other public information, accounting and financial reporting practices at BASF SE appear to be generally appropriate and effective relative to global peers.

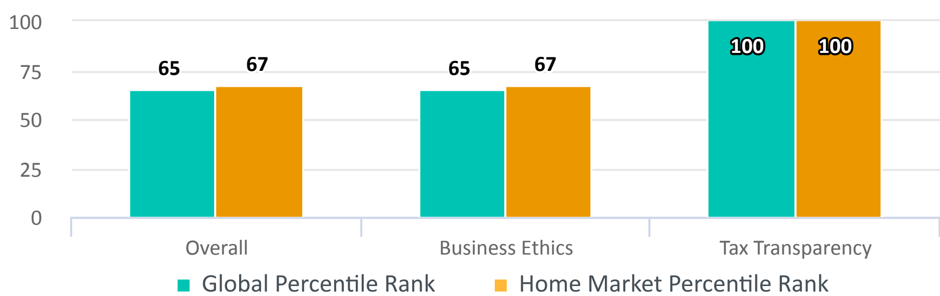
CORPORATE BEHAVIOR THEME AND KEY ISSUE RANKINGS



METHODOLOGY NOTE

This theme evaluates the extent to which companies may face ethics issues such as fraud, executive misconduct, corruption scandals, money laundering, anti-trust violations, or tax-related controversies.

*[For symbols and terms used in this report, refer to the Glossary section at the end of the report]

KEY AREAS OF CONCERN* | SCORING DEDUCTIONS

Business Ethics Policies & Practices **(-1.70)**

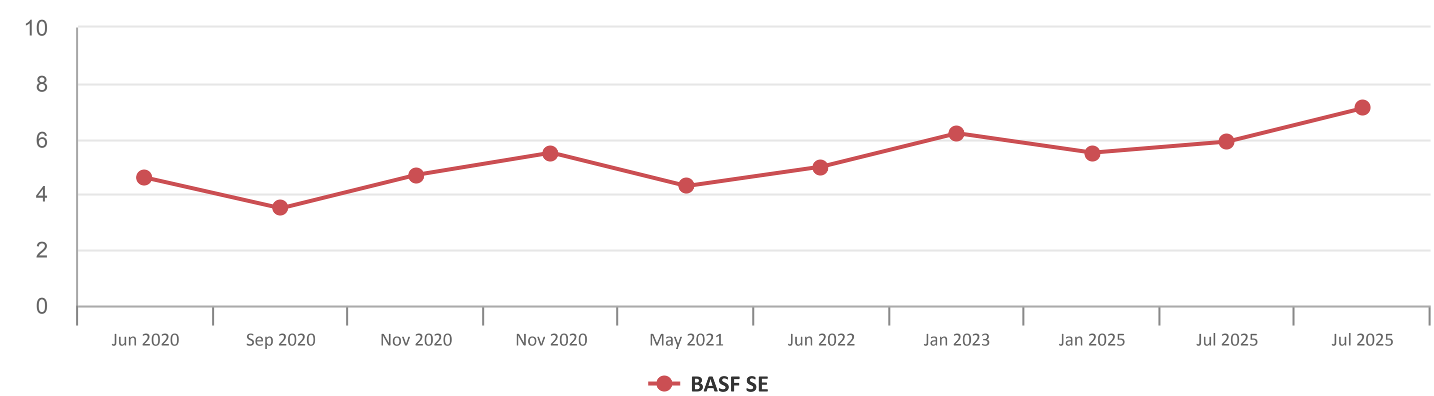
- Regular Audits of Ethical Standards
- Employee Training on Ethical Standards

Business Ethics Risk & Controversies **(-1.20)**

- Corruption Risk Exposure & Controversies

**Key areas of concern include flagged key metrics that represent the largest scoring deductions. Please review the full report to see a complete set of flagged key metrics.*

CORPORATE BEHAVIOR SCORE HISTORY



BUSINESS ETHICS

KEY METRICS SCORING

	Deduction
BUSINESS ETHICS POLICIES & PRACTICES	**-1.70**
Regular Audits of Ethical Standards	-0.70
Employee Training on Ethical Standards	-1.00
BUSINESS ETHICS RISK & CONTROVERSIES	**-1.20**
Corruption Risk Exposure & Controversies	-1.20

Note: Business Ethics Policies & Practices deductions as well as Business Ethics Risk & Controversies are capped at a maximum of -7.0. Cumulative deductions are capped at 10.

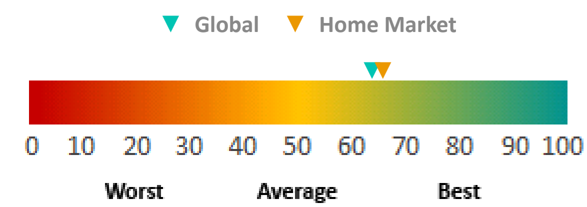
0-10 Score	Change (since rating)	Global Percentile Rank	Home Market Percentile Rank
7.0	▲ 1.2	65th (Average)	67th (Average)

METHODOLOGY NOTE

Companies are evaluated on their oversight and management of business ethics issues such as fraud, executive misconduct, corrupt practices, money laundering, or anti-trust violations.

*[For symbols and terms used in this report, refer to the Glossary section at the end of the report]

BUSINESS ETHICS VS.



BUSINESS ETHICS POLICIES & PRACTICES

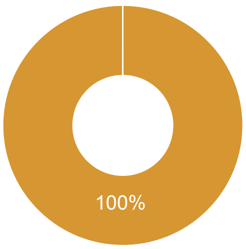
Indicators	Company Practice	Best Practice	Deduction
Responsibility for ethics issues	Board-level committee	Board-level committee or C-suite or Executive committee	0.00
Policy against bribery and corruption	Detailed formal policy on bribery and anti-corruption	Detailed formal policy on bribery and anti-corruption	0.00
Regular Audits of Ethical Standards	Evidence of audits but no specific details / Audits conducted but not on a regular schedule	Audits of all operations at least once every three years	-0.70
Whistleblower protection	Policy provides whistleblowers with protection from retaliation	Policy provides whistleblowers with protection from retaliation	0.00
Employee training on ethical standards	General statements on employee training on ethical standards	Programs covering all employees (including part-time) and contractors	-1.00
Policy against bribery and corruption for suppliers	NA	All suppliers are required to have anti-corruption policies and programs to verify compliance	0.00
Anti-money laundering policy	NA	Policy and implementation strategy articulated	0.00

**Business Ethics Policies & Practices deductions are capped at a maximum of -7.0.*

CORRUPTION RISK EXPOSURE

Exposure to: Regulatory risks or lost market access due to corruption scandals or political and social instability
Business Types : Percentage of operations in business segments perceived most likely to pay or receive bribes

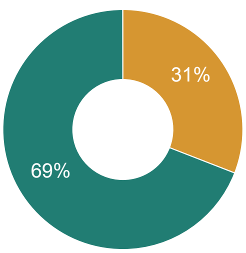
■ High Risk ■ Medium Risk ■ Low Risk



- No exposure to high risk segments
- Pesticides and agricultural chemicals, Industrial organic chemicals, Diversified industrial inorganic chemicals, Chemicals and chemical preparations
- No exposure to low risk segments

Source: Bribe Payers Index (Transparency International); State Capture Index (Transparency International); Refinitiv; MSCI ESG Research; company disclosures

Business Locations : Percentage of operations in countries with high/moderate/low level of corruption and political instability, violence or terrorism



- No operations in markets with high risks
- China, Asia Pacific, Africa & South America
- North America, Germany, USA, Europe

Source: Corruption Perceptions Index (Transparency International); World Governance Indicators (World Bank); Refinitiv; MSCI ESG Research; company disclosures

CORRUPTION RISK EXPOSURE SCORING DEDUCTION KEY

% of operations in medium and high risk geographies	% of operations in high risk business segments	>=20% government ownership	<20% government ownership	No evidence of government ownership
20% or more	50% or more	-4.00	-2.60	-2.00
	Less than 50%	-1.20	-1.20	-1.20
Less than 20%	50% or more	-0.60	-0.60	-0.60
	Less than 50%	0.00	0.00	0.00

**The Corruption Risk and Controversies Deduction is based on the maximum of deductions from the corruption risk exposure and corruption controversies category listed below*

BUSINESS ETHICS CONTROVERSIES

Controversy Cases

Category	Assessment	Headline	Status	Last Updated	Deduction
Business Ethics & Fraud	--	**No ongoing controversies.**	--	--	--
Anticompetitive Practices	--	**No ongoing controversies.**	--	--	--
Corruption	--	**No ongoing controversies.**	--	--	--

**The maximum deductions from the Anticompetitive Practices and Business Ethics & Fraud categories are summed to arrive at the overall Business Ethics Controversies deduction, which is capped at a maximum of -7.0.*

TAX TRANSPARENCY

TAX GAP ASSESSMENT

0-10 score	Change (since rating)	Global Percentile Rank	Home Market Percentile Rank
10.0	0.0	100th (Best In Class)	100th (Best In Class)

Indicators

Tax Gap

Estimated Effective Tax Rate	
Estimated Corporate Income Tax Rate	26.3%
Estimated Tax Gap	
Tax Gap Assessment	

Revenue

Foreign Revenue	83.1%

Confidence

Confidence Level of Estimation	Medium

Involvement in Controversies NO

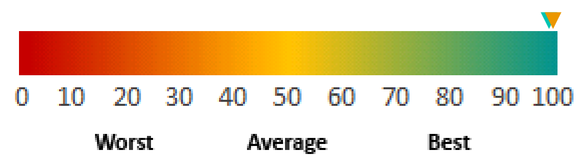
METHODOLOGY NOTE

Companies are evaluated on their estimated corporate tax gap (i.e. gap between estimated effective tax rate and estimated corporate income tax rate) and their involvement in tax-related controversies.

*[For symbols and terms used in this report, refer to the Glossary section at the end of the report]

TAX TRANSPARENCY VS.

▼ Global ▼ Home Market



TAX CONTROVERSIES

Controversy Cases

Category	Assessment	Headline	Status	Last Updated	Deduction
Tax Transparency	--	**No ongoing controversies.**	--	--	--

TAX CONTROVERSIES SCORING DEDUCTION KEY

Involvement in tax controversies	Estimated tax gap	Tax gap assessment	Deduction
Yes	Below 5%	Low	-0.80
	5-10%	Moderate	-1.40
	Above 10%	High	-2.00
No	Below 5%	Low	0.00
	5-10%	Moderate	0.00
	Above 10%	High	0.00

Tax related controversies are not considered for companies in Real Estate Management services or Mortgage REITs industries. Tax gap assessment is effectively low for companies with less than 5% of total revenue categorized as foreign.

2015	Universum	One of the Worlds Most Attractive Employer

Employee turnover

Year	Annual employee turnover (%)	Details
2024	7.20%	
2023	3.50%	
2022	1.90%	
2021	1.50%	
2020	1.00%	
2019	1.40%	
2018	1.30%	10,659000000/122404
2017		The BASF Group hired 8,916 new employees in 2017. The average percentage of employees who resigned during their first three years of employment was 1.3% worldwide in 2017. This turnover rate was 0.7% in Europe, 1.9% in North America, 3.0% in Asia Pacific and 2.1% in South America, Africa, Middle East. Our early turnover rate is therefore at a desirable low level.
2016		Worldwide, the percentage of employees who resigned during their first three years of employment was 1.2% on average in 2016. This turnover rate was 0.5% in Europe, 1.5% in North America, 3.2% in Asia Pacific and 1.9% in South America, Africa, Middle East. Our turnover rates are therefore lower than those of many other companies.

METHODOLOGY NOTE

This issue evaluates the extent to which companies may face regulatory risks relating to anti-competitive practices. Companies successfully avoiding incident score "5", while companies that have faced controversies in the last three years score lower, based on the severity and type of controversy. This Key Issue is discontinued effective November 2020.

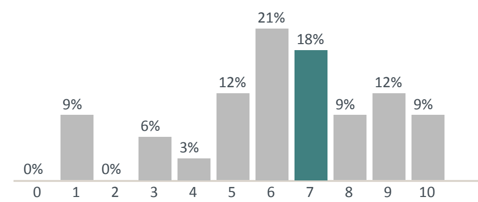
KEY ISSUE SCORE DISTRIBUTION*



This issue does not present significant risks or opportunities to the company and with the assigned weight of 0% does not contribute to the overall ESG rating for the company.

MSCI ESG Research provides additional scores on a select set of ESG Issues for all companies on the MSCI ACWI Index and MSCI ACWI IMI Index. Every company on the index receives scores for the following ESG Issues, regardless of whether they contribute to the overall Company ESG Rating.

The additional key issue scores and data available by index are as follows:

- MSCI ACWI: Water Stress, Labor Management, Privacy and Data Security
- MSCI ACWI IMI: Carbon Emissions, Human Capital Development and Tax Transparency

We continue to provide data and scores for the discontinued Key Issues under the ESG Rating model for the MSCI ACWI Index: Corruption & Instability, Business Ethics & Fraud, Anticompetitive Practices.

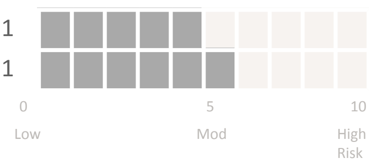
EXPOSURE

RISK EXPOSURE ASSESSMENT

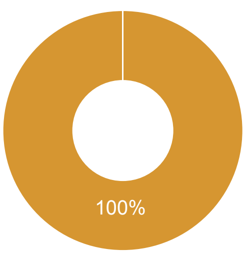
Company	5.1
Industry	6.1



Key Drivers of Risk Exposure

Exposure to: Regulatory risks or lost market access due to corruption scandals or political and social instability

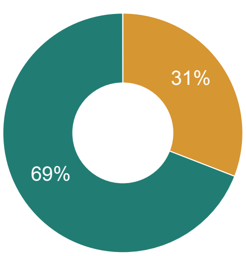
Business Types : Percentage of operations in business segments perceived most likely to pay or receive bribes



- No exposure to high risk segments
- Pesticides and agricultural chemicals, Industrial organic chemicals, Diversified industrial inorganic chemicals, Chemicals and chemical preparations
- No exposure to low risk segments

Source: Bribe Payers Index (Transparency International); State Capture Index (Transparency International); Refinitiv; MSCI ESG Research; company disclosures

Business Locations : Percentage of operations in countries with high/moderate/low level of corruption and political instability, violence or terrorism



- No operations in markets with high risks
- China, Asia Pacific, Africa & South America
- North America, Germany, USA, Europe

Source: Corruption Perceptions Index (Transparency International); World Governance Indicators (World Bank); Refinitiv; MSCI ESG Research; company disclosures

Additional Drivers of Exposure

Company is reliant on the government sectors for a major proportion: **No**

Decline in worldwide bee populations linked to neonicotinoid insecticides

BASF has faced opposition from nongovernment organizations and farmers in several countries due to the alleged impact of Fipronil, an insecticide manufactured by BASF, on the worldwide bee population. In May 2013, the European Commission (EC) banned the use of fipronil for allegedly posing a "high acute risk" to the honeybee population and other pollinators. According to the European Food Safety Authority (EFSA) report, the use of fipronil on maize crops could have contributed to the declining populations of pollinators including the honeybees. Fipronil had been banned as a treatment for maize and sunflowers for two years starting in January 2014. The EC had earlier banned three insecticides containing neonicotinoids, which were also linked to the bee population decline.

As of September 2019, Fipronil continued to be manufactured and commercialized in several countries by BASF under different trade names and it has continuously received criticism from NGOs and local farmers for the alleged contribution to the increased killing of pollinators.

In April 2023, a news article reported that chemical companies, including BASF, continued to export pesticides to Brazil despite being banned by the EU, such as Regent 800WG, an insecticide that "includes the active ingredients fipronil and triflumuron." In response, BASF representatives expressed the validity and safety of their products.

UPDATES: 25 Apr 2024: No new information available.

25 Apr 2023: EU firms accused of 'abhorrent' export of banned pesticides to Brazil. (The Guardian)

18 Oct 2022: Imports and exports: banned but sold anyway. (Heinrich Böll Stiftung) Heinrich Böll Stiftung, an independent political foundation, noted in an article that European companies, including BASF, had been exporting pesticides with harmful active ingredients to other countries, such as Brazil and South Africa, despite being banned in EU.

10 Sep 2020: For European chemical giants, Brazil is an open market for toxic pesticides banned at home. (Mongabay)

17 Sep 2019: O agrotóxico que matou 50 milhões de abelhas em Santa Catarina em um só mês. [The pesticide that killed 50 million bees in Santa Catarina in one month] (BBC)

23 Aug 2019: Half a billion bees dead as Brazil approves hundreds more pesticides. (Mongabay) According to an investigative report conducted by Reporter Brasil NGO in four states of Brazil, approximately half-billion bees died in only three months due to the alleged exposure to neonicotinoids and Fipronil insecticides. BASF's exclusive patent of Fipronil expired in 2008 in the country but the company continued to sell Fipronil in Brazil under the trade names Standak, Regent 800WG, Tuit Florestal, Blitz NA, Klap, Goliath Gel, Termidor 25 CE and Blitz Casa e Jardim.

18 Jun 2019: Apiarist calls for chemical Fipronil to be banned after millions of bees die in Southern NSW. (ABC News) In April 2019, five apiarists from New South Wales, Australia, called for a ban on Fipronil after claiming the loss of 340 hives that had allegedly been poisoned by the insecticide.

26 Nov 2018: South African bees: 'One million die in Cape Town'. (BBC) In November 2018, Fipronil was named as the most probable cause of death of at least one million bees in South Africa due to the use of the insecticide in wine farms.

17 May 2018: BASF : Restrictions d'utilisation de trois néonicotinoïdes confirmées. [Restrictions on the use of three neonicotinoids confirmed] (Swissinfo) In May 2018, the European Union Court annulled the 2013 decision to restrict the use of fipronil on the grounds that the EU had failed to conduct a proper assessment of the impacts of the pesticide.

27 Apr 2018: Néonicotinoïdes : l'Europe cesse de jouer à la roulette ruche [Neonicotinoids: Europe stops playing roulette hive]. (Libération) In April 2018, 28 European Member States voted to ban three neonicotinoid pesticides due to the alleged impact on honeybee population and the potential effects to human health.

15 May 2017: Company Communication. (BASF)

22 Mar 2017: Comment lutter efficacement contre le déclin des pollinisateurs. [How can we effectively combat the decline of pollinators] (Senate of France)

SOCIAL CONTROVERSIES

Severe Controversies

Date: October 2025

Assessment: Severe
Status: Ongoing

BASF Corporation, US: Lawsuits alleging health-related risks linked to exposure to per- and polyfluoroalkyl substances and aqueous firefighting foam

BASF Corporation, a subsidiary of BASF SE, along with multiple other chemical manufacturing companies continued to face multiple personal injury lawsuits related to per- and polyfluoroalkyl substances (PFAS) used in several products, including aqueous film-forming foams (AFFF) used in firefighting. These injuries and health complications reportedly resulted from long-term contamination and exposure to PFAS, a group of synthetic chemicals widely used in consumer products since the 1950s that are sometimes dubbed "forever chemicals" because they do not biodegrade but bioaccumulate instead, posing multiple health risks to humans and the environment.

Ongoing lawsuits and AFFF Products Liability Litigation (MDL 2873)

In December 2018, the Judicial Panel on Multi-District Litigation (JPML) ordered to consolidate the lawsuits related to AFFF and PFAS claims in the South Carolina District Court. Approximately 1,860 personal injury cases were reportedly included in the MDL as of December 2021. Personal injury allegations included the absence of medical monitoring required for affected residents as well as claims made on behalf of firefighters that exposure to the firefighting foam resulted in certain types of cancer and other injuries. Several US states have also filed lawsuits since 2017, some included in the MDL, alleging damages to natural resources, and claiming compensation for economic losses related to the contamination. These state lawsuits also highlighted alleged harm to public health linked to the contamination and the companies' alleged failure to warn the public and firefighter trainees about possible health risks of PFAS exposure from AFFF products.

In May 2024, BASF Corporation reached a settlement with public water systems and agreed to pay USD 316.5 million to resolve claims of allegedly contaminating their drinking water supply sources through firefighting foams containing PFAS.

As of September 2025, BASF Corporation continued to face lawsuits alleging harm related to PFAS exposure from AFFF products. JPML reported approximately 12,915 cases currently pending before the court.

In October 2025, the Leech Lake Band of Ojibwe, a Native American tribe in Minnesota, filed a federal lawsuit against BASF Corporation and several other chemical companies over alleged PFAS contamination of land and water within the Leech Lake Reservation. The tribe claimed that the pollution has affected local water and wildlife resources, and argued that it could harm their health, cultural practices, and treaty rights.

The companies involved in MDL 2873 include 3M Company, AGC Chemicals Americas Inc. (a subsidiary of AGC, Inc.), Arkema Inc., BASF Corporation (a subsidiary of BASF SE), Carrier Global Corporation, Chubb Fire, Ltd. (a subsidiary of APi Group Corporation), Clariant Corporation (a subsidiary of Clariant AG), Corteva Inc., Daikin America Inc. (a subsidiary of Daikin Industries Ltd.), Deepwater Chemicals, Inc. (a subsidiary of Toyota Tsusho Corporation), Dupont De Nemours, Inc., Honeywell International Inc., Johnson Controls International PLC, Mine Safety Appliances Company, LLC (a subsidiary of MSA Safety Incorporated), National Express, LLC (a subsidiary of Mobico Group), NSK Corporation (a subsidiary of NSK Ltd.), Perimeter Solutions LP (a subsidiary of Perimeter Solutions SA), Phillips 66 Pipeline LLC (a subsidiary of Phillips 66), Raytheon Technologies Corporation (a subsidiary of RTX Corporation), Solvay Specialty Polymers USA, LLC (a subsidiary of Solvay SA), and The Chemours Company.

Status: Partially Concluded

China: Allegations of forced labor related to suppliers employing ethnic minorities through coercive state-sponsored labor-transfer programs

LATEST: In June 2025, The Diplomat reported that a non-governmental organization, Global Rights Compliance (GRC), published an investigation linking multiple Western companies to the critical minerals industry in the Xinjiang Uyghur Autonomous Region (XUAR). GRC alleged that these companies were at risk of having forced labor in their supply chains due to their use of minerals or mineral-based products from Chinese suppliers sourcing from XUAR. The products reportedly included commercial paints, insulated cups, and components used in the aerospace, auto, and defense industries. According to The Diplomat, BASF responded to GRC claiming it has not had a business relationship with the Chinese firm named in GRC's report since 2018. BASF also expressed its commitment to human rights due diligence in its own activities and its supply chain.

BACKGROUND: Several other reports in recent years raised allegations of state-sponsored coercive labor transfer schemes involving ethnic minority workers from Xinjiang.

Media reports claimed that since 2017, more than one million Uyghurs, Kazakhs and other ethnic minorities have been arbitrarily detained in 're-education camps' or 'Vocational Education and Training Centres' (VETCs), held under constant electronic and in-person surveillance, and subjected to human rights abuses. In a June 2021 report by Amnesty International entitled "Like we were enemies in a war", 55 former detainees were interviewed offering first-hand accounts of the conditions inside these centers and factories they were later transferred to.

In August 2022, the United Nations High Commissioner for Human Rights (OHCHR) published its "Assessment of human rights concerns in the Xinjiang Uyghur Autonomous Region, People's Republic of China" and considered the legal framework justifying these re-education camps to be discriminatory in nature and posing serious risk of human rights violations. The OHCHR report also claimed to have found a link between the VETCs and the (state-sponsored) labor transfer schemes where companies both local and international were incentivized to absorb labor from the camps.

In response to the OHCHR report, the People's Republic of China (PRC) has defended VETCs as tools for poverty alleviation and countering terrorism and religious extremism, and claims "trainees who have completed their studies in education and training centers have gone on to find employment in factories and enterprises."

China: Allegations of forced labor related to employing ethnic minorities through coercive state-sponsored labor-transfer programs

LATEST: In April 2025, BASF SE (BASF) announced that it had completed the sale of its two joint ventures in the Xinjiang Uyghur Autonomous Region (XUAR) in China, following approval by the relevant authorities.

PREVIOUS UPDATES: In November 2023, Handelsblatt alleged that BASF's joint venture partner Xinjiang Markor Chemical Industry Co Ltd (Markor) benefitted from forced labor practices. The article referred to investigations by risk and compliance advisory group Kharon in November 2022, which suggest that the economic development zone of Korla in Xinjiang was a key destination for state-sponsored labor transfers of Uyghurs and that it had evidence of re-education camps in Korla.

In November 2023, Radio Free Asia reported that BASF was potentially ignoring the possibility of forced labor at its Korla plants. It quoted the German-based Association of Ethical Shareholders as saying an independent audit would not be a credible mechanism for ruling out forced labor due to restrictions by Chinese authorities. As of November 2023, there have been no allegations that BASF-owned factories have benefitted from forced labor.

BASF acknowledged the concerns and confirmed that 120 people were employed across two Xinjiang facilities in which it had a stake. Of these 120 people, 40 were employed at its joint venture BASF Markor Chemical Manufacturing (Xinjiang) Co Ltd. BASF did not confirm whether any of these employees were from Uyghur or other ethnic minority groups and claimed that neither its own internal audits, nor those carried out independently had found any evidence of forced labor in 2019, 2020 or 2023.

Prior to the reports, in August 2023, Voice of America reported that two shareholders of Markor, namely Zhongtai Group and Zhongtai Chemical Group, were flagged by the US Department of Commerce for potential human rights concerns and links to forced labor in Xinjiang.

In February 2024, Der Spiegel and ZDF reported that in 2018 and 2019, employees of BASF's joint venture partner, Markor, accompanied state officials on home visits to Uyghur households as part of government initiatives that the human rights groups alleged were used to surveil and indoctrinate Uyghurs. Following the media report, BASF announced that it had decided to accelerate its ongoing process to divest its shares in the two joint ventures in Xinjiang (BASF Markor Chemical Manufacturing (Xinjiang) Co Ltd., and Markor Meiou Chemical Xinjiang Co Ltd), subject to negotiations and regulatory approvals. BASF highlighted that it had no indication that employees of the two joint ventures were involved in human rights violations and that the recent media reported home visits only related to its joint venture partner, Markor, in which it has no stake.

BACKGROUND: Multiple other reports in recent years have raised allegations of state-sponsored coercive labor transfer schemes involving ethnic minority workers from Xinjiang.

Media reports claimed that since 2017, more than one million Uyghurs, Kazakhs and other ethnic minorities have been arbitrarily detained in 're-education camps' or 'Vocational Education and Training Centres' (VETCs), held under constant electronic and in-person surveillance, and subjected to human rights abuses. In a June 2021 report by Amnesty International entitled "Like we were enemies in a war", 55 former detainees were interviewed offering first-hand accounts of the conditions inside these centers and factories they were later transferred to.

In August 2022, the United Nations High Commissioner for Human Rights (OHCHR) published its "Assessment of human rights concerns in the Xinjiang Uyghur Autonomous Region, People's Republic of China" and considered the legal framework justifying these re-education camps to be discriminatory in nature and posing serious risk of human rights violations. The OHCHR report also claimed to have found a link between the VETCs and the (state-sponsored) labor transfer schemes where companies both local and international were incentivized to absorb labor from the camps.

In response to the OHCHR report, the People's Republic of China (PRC) has defended VETCs as tools for poverty alleviation and countering terrorism and religious extremism, and claims "trainees who have completed their studies in education and training centers have gone on to find employment in factories and enterprises."

GERMANY

CURRENCY: EURO (EUR)

The legislative framework for corporate governance in Germany is based on the Stock Corporation Act (AktG). The primary regulation for European companies is the Societas Europae (SE) Regulation. Additional regulations apply to listed companies under the Securities Trading Act (WpHG) and the Takeover Act (WpUG). There is also the German Corporate Governance Code (DCGK) which is adopted on an “comply or explain” basis.

The board structure in Germany is two-tier, consisting of a management board responsible for business management, and a supervisory board responsible for the supervision of companies’ activities. A European company (Societas Europea - SE) can choose between a one-tier or a two-tier system.

Shareholders elect the supervisory board directors, which in turn appoint members of the management board. There is no requirement for employee representatives to be elected to the supervisory board of companies with less than 500 employees. Companies with 501 to 2000 employees must have a supervisory board consisting of one-third of employee representatives. Companies with over more than 2000 employees are required to establish a supervisory board consisting of 50% employee and union representatives.

Management boards should have at least one member, while supervisory boards must consist of at least three. In a two-tier board structure, management board members cannot sit on the supervisory board and vice versa. The maximum term of appointment for both management and supervisory board members is five years, subject to renewal.

There is a mandatory quota of 30% gender diversity on supervisory boards and a legal requirement to disclose statistics on gender composition of boards and senior management. There are sanctions for non-compliance.

Listed companies must disclose the pay of individual board members. Supervisory board members’ pay is approved by the general meeting. The supervisory board determines the pay of members of the management board. Shareholders have an advisory, non-binding vote on the pay system for members of the management board.

The DCGK recommends that directors’ pay include both fixed and variable components. The amount of the variable component, as well as the aggregate pay, shall be capped.

Highly concentrated ownership is common in German companies with controlling shareholders holding more than 30% of a company’s share capital. The presence of widely held companies can be observed.

A minimum of 30-day notice must be given to shareholders in advance of the annual shareholders’ meeting. Shareholders with at least 5% of shares may request to call a shareholders meeting and propose agenda items. Issuing a class of shares with limited voting rights is allowed. Issuing a class of shares without voting rights is also allowed but capped at 50%. Multiple voting rights and voting caps are not permitted. Shareholder are entitled to challenge the decisions of the general meeting if certain laws are violated in the process, but generally, actions conducted in the ordinary course of running the company are not subject to shareholder claims.

A qualified majority (at least 75% of the votes cast) is required for passing resolutions of significant importance such as: increasing the share capital, amending the articles of association, approving any profit transfer agreements, mergers and other reorganization matters, as well as liquidating the company. Dismissing supervisory board members also requires a qualified majority, however the Stock Corporation Act (AktG) provides for lowering this threshold through the company’s articles.

Board or shareholder approval for related party transactions is not required. A mandatory takeover bid is triggered upon the acquisition of 30% of the voting rights of a target company.

The company’s accounts must be audited by an independent auditor annually. The auditor is appointed by shareholders’ meeting for a term that ends with the performance of the audit. The Code recommends the supervisory board to establish an audit committee to oversee accountancy and risk management issues and to ensure the independence of the auditor. There is usually a limit of 10 or 20 years on the reappointment of the auditor (Regulation EU No. 537/2014). To be reappointed after this term, a cooling off period of four years must be observed.

GLOSSARY

MSCI ESG RATINGS AND SCORES

FINAL ESG RATING

- Letter ratings are relative within each MSCI ESG Ratings industry. Each Final Industry-Adjusted Company Score is converted to an equivalent rating on the AAA-CCC scale.

ESG PILLARS

- the ***Environment Score*** represents the weighted average of all Key Issues that fall under the Environment Pillar
- the ***Social Score*** represents the weighted average of all Key Issues that fall under the Social Pillar
- the ***Governance Score*** represents the sum of score deductions derived from Key Metrics included in Corporate Governance (including Board, Pay, Ownership & Control, and Accounting) and Corporate Behavior (including Business Ethics and Tax Transparency)

- the ***Environment Weight*** represents the sum of the weights of all Key Issues that fall under the Environment Pillar
- the ***Social Weight*** represents the sum of the weights of all Key Issues that fall under the Social Pillar
- the ***Governance Weight*** represents the sum of the weights of Corporate Governance and Corporate Behavior, with a minimum weight set at 33% for all rated issuers

KEY ISSUES

For each industry and Company-Specific Key Issue that contributes to the final rating:

- ***Weight*** contribution to the final rating
- ***Exposure*** Score (available for companies published since June 2011; excluding Raw Material Sourcing – Environmental)
- ***Management*** Score (available for companies published since June 2011; excluding Raw Material Sourcing – Environmental)
- Overall ***Key Issue Score***

WEIGHTED-AVERAGE KEY ISSUE SCORE VS. INDUSTRY RELATIVE SCORE

- the ***Weighted-Average Key Issue Score*** is dynamic, reflecting changes in any underlying scores as of the Last Update date, while the ***Industry Relative Score*** is more static and corresponds to the Rating Date. Issues that we determine do not present material risks or opportunities to companies in a given industry receive 0% weight and do not impact the overall ESG rating.

SCORES AND CALCULATION OF AVERAGE, PERCENTILE AND RATING DISTRIBUTION

All averages, percentiles, and rating distributions found in the report are based on companies in the relevant MSCI ESG Ratings Industry that are constituents of the MSCI ACWI and are calculated based on industry scores as of the date of publication of this report.

ESTIMATED CARBON EMISSIONS

Carbon estimates are based on carbon intensity (carbon emissions/sales). The Estimate Key represents the source of the estimated carbon emissions data. E.CSI represents Company-Specific Intensity estimates based on previously disclosed data. E.GICSSI represents estimates based on the GICS Sub-Industry average. For E.GICSSI we set five levels of confidence (High, Moderately High, Moderate, Moderately Low, and Low). The Carbon Estimation Methodology document, available on ESG Manager, describes the estimation model in greater detail.

GOVERNMENT SUPPORT RATING

We calculate the 'government support rating' for Supranationals and Development Banks based on the weighted average of member countries' Governance scores using the MSCI ESG Government Ratings methodology. These scores are based on measures of political governance (strength of institutions, corruption control, civil liberties, and human rights) and financial accountability.

NOTICE AND DISCLAIMER

ABOUT MSCI ESG RESEARCH PRODUCTS AND SERVICES

MSCI ESG Research products and services are provided by MSCI ESG Research LLC, and are designed to provide in-depth research, ratings and analysis of environmental, social and governance-related business practices to companies worldwide. ESG ratings, data and analysis from MSCI ESG Research LLC are also used in the construction of the MSCI ESG Indexes. MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc.

ABOUT MSCI

MSCI is a leading provider of critical decision support tools and services for the global investment community. With over 50 years of expertise in research, data and technology, we power better investment decisions by enabling clients to understand and analyze key drivers of risk and return and confidently build more effective portfolios. We create industry-leading research-enhanced solutions that clients use to gain insight into and improve transparency across the investment process.
